***** Instructions *****
Please attach to parcel. (do not put sellotape over the label as it will become difficult to scan).
We strongly recommend for you to print off two labels and to place one inside the parcel itself so that it can easily be identified if necessary.

IMPORTANT: This is a drop-off service so you will need to take your parcel to your nearest drop-off point. See our store locator at http://www.parcel2go.com/parcel-suppliers-myhermes.aspx

When you take your parcel to the Hermes ParcelShop, you will be given a receipt which will show your tracking number. You can use this to track your parcel on our website

Please ensure there are no flammable liquids in the package. Car parts should be devoid of both liquids and fumes as this can contaminate other parcels.

Please be kind to our drivers by ensuring that any glass item is securely packaged and protected as broken glass may have to be disposed of for health and safety reasons.

Please ensure that all sharp corners are adequately packaged and protected.

Please remove any previous labelling, stickers or warning signs from the packaging.
